QUARTER AT A GLANCE

Website traffic grew **39%** this quarter, driven by improving Google search rankings and a stronger Google Business Profile. Search impressions nearly doubled, organic clicks increased **74%**, and average search position improved from 24.2 → 14.3. The site maintained near-perfect uptime with zero security incidents. Overall momentum is strong — detailed breakdowns follow on the pages below.

FULL METRICS SNAPSHOT

Metric	Q1 Total	Q4 Prior	Change	Trend
Total Website Sessions	1,257	903	+354	▲ +39.2%
Unique Users	1,050	762	+288	▲ +37.8%
Pageviews	3,841	2,614	+1,227	▲ +46.9%
Bounce Rate	41.2%	52.7%	−1.5%	▲ improved
Google Search Impressions	10,910	6,901	+4,009	▲ +58.1%
Google Search Clicks	280	161	+119	▲ +73.9%

Traffic Overview

TOTAL SESSIONS 1,257 Jan – Mar 2025	UNIQUE USERS 1,050 Jan – Mar 2025	PAGEVIEWS 3,841 Jan – Mar 2025	AVG. DURATION 2m 14s per session
--	--	---	---

How to read this: A **Session** is one visit to your site (one person, one sitting). **Unique Users** counts individual visitors — someone who visits 3 times is 1 user, 3 sessions. **Pageviews** counts every page loaded across all visits. **Avg. Duration** is how long visitors spend on your site per visit — longer is better. **Bounce Rate** is the % who leave after viewing only one page — lower is better. Steady monthly growth in sessions indicates your site is gaining visibility over time.

Monthly Sessions vs. Unique Users

Monthly Breakdown

Month	Sessions	Users	Pageviews	Avg. Duration	Bounce Rate
January	312	248	921	1m 58s	47.3%
February	427	361	1,304	2m 09s	43.1%
March	518	441	1,616	2m 34s	36.7%
Q1 TOTAL	1,257	1,050	3,841	2m 14s	41.2%

Traffic Sources

Source	Sessions	% of Total	Trend vs Prior Quarter
Organic Search (Google)	687	54.6%	▲ +61%

Direct	289	23.0%	▲ +18%
Google Business Profile	196	15.6%	▲ +44%
Referral	62	4.9%	▲ +12%
Social	23	1.8%	▲ +5%

Google Search Console

TOTAL IMPRESSIONS	ORGANIC CLICKS	AVG. CTR	AVG. POSITION
10,910	280	2.6%	14.3
times shown in search	click-throughs to site	↑ from 2.3% last qtr	↑ from 24.2 last qtr

How to read this: **Impressions** = the number of times your site appeared in a Google search result (whether or not anyone clicked). **Clicks** = how many people actually visited your site from that result. **CTR (Click-Through Rate)** = Clicks ÷ Impressions — a higher % means your listing is compelling enough to click. **Avg. Position** = your average ranking in Google search results — position 1 is the top result, lower numbers are better. **Growth action:** Keywords ranking positions 5–15 have the most room to improve — adding dedicated service pages and refining on-page content for those terms typically moves them into the top 5 within 2–3 months.

Monthly Search Impressions

Month-by-Month Search Data

Month	Impressions	Clicks	CTR	Avg. Position	Pos. Change
January	2,840	68	2.4%	24.2	—
February	3,920	94	2.4%	18.7	▲ +5.5
March	4,150	118	2.8%	14.3	▲ +4.4
Q1 TOTAL	10,910	280	2.6%	14.3	▲ +9.9

Top Keywords This Quarter

Keyword / Search Term	Impressions	Clicks	CTR	Avg. Position
[primary service] [city]	1,840	72	3.9%	4.2

[city] [secondary service]	290	7	2.4%	21.3
[service] estimate [city]	220	5	2.3%	24.7

GBP Performance

How to read this: GBP (Google Business Profile) is your listing that appears in Google Maps and the local “map pack” at the top of search results. **Profile Views** = how many people saw your listing. **Direct Searches** = people who searched your business name specifically (they already know you). **Discovery Searches** = people who found you by searching a service or category (new potential customers). Growing discovery searches is the biggest indicator of local SEO momentum. **Growth actions:** Posting to GBP weekly, responding to every review within 48 hours, and keeping business hours / photos current all directly improve your visibility in discovery searches.

Monthly GBP Activity

Monthly GBP Breakdown

Month	Profile Views	Searches	Phone Calls	Directions	Web Clicks
January	420	680	28	12	45
February	580	920	39	18	67
March	640	1,040	47	22	84
Q1 TOTAL	1,640	2,640	114	52	196

UPTIME

99.98%

0 outages, 2m 42s total downtime

Core Web Vitals explained: **FCP (First Contentful Paint)** — how quickly the first text or image appears on screen. **LCP (Largest Contentful Paint)** — how long until the main content is fully loaded — Google's primary speed signal; under 2.5s is excellent. **TBT (Total Blocking Time)** — time the page is unresponsive to user input while loading; 0ms means instant responsiveness. **CLS (Cumulative Layout Shift)** — measures visual stability — a score near 0 means nothing jumps around while loading. **SI (Speed Index)** — how quickly content becomes visible overall. **TTI (Time to Interactive)** — when the page is fully ready to respond to clicks and taps. Scores 90–100 are green (Excellent), 50–89 are amber (Needs Improvement), below 50 are red (Poor). Google uses these scores as a ranking factor — a fast, stable site ranks higher and converts better.

Core Web Vitals

Core Web Vital	Value	Score	Rating
First Contentful Paint	0.8s	98	Excellent
Largest Contentful Paint	1.2s	94	Excellent
Total Blocking Time	0ms	100	Excellent
Cumulative Layout Shift	0.02	97	Excellent
Speed Index	1.1s	95	Excellent
Time to Interactive	1.4s	92	Excellent

Security & Uptime Checks

Check	Status	Details
SSL Certificate	✓ ACTIVE	Valid — expires [MM/DD/YYYY]
HTTPS Redirect	✓ ACTIVE	All HTTP traffic auto-redirects to HTTPS
Uptime This Quarter	99.98%	2 min 42 sec total downtime — 0 incidents
Security Incidents	0 FOUND	No unauthorized access attempts logged
Domain Expiry	✓ ACTIVE	Expires [MM/DD/YYYY] — auto-renew enabled

DNS Health	✓ HEALTHY	All DNS records resolving correctly
Mobile Friendliness	✓ PASSED	Google Mobile-Friendly Test: Pass
Broken Links	0 FOUND	Full site crawl completed [Month YYYY]
Form Functionality	✓ WORKING	Contact form tested — submissions routing correctly

received this quarter

TOTAL REVIEWS

14

lifetime on Google

RESPONSE RATE

83%

reviews responded to

Why reviews matter: Google reviews are one of the top 3 local ranking factors. Businesses with more reviews and higher ratings consistently appear higher in the Google Maps pack and local search results. **Response Rate** measures how often you publicly reply to reviews — responding to both positive and negative reviews signals professionalism and improves ranking. A rating of 4.5+ with 20+ reviews is the threshold where most customers trust a business enough to contact them without hesitation. **Growth action:** Ask for reviews within 24 hours of a completed job while the experience is fresh — a short text with a direct link converts at 3–5× higher than asking in person. Aim to respond to every review within 48 hours.

WORK COMPLETED

Changes & Updates This Quarter

Content Updates

- ✓ Updated services page with [X] new service descriptions provided by client
- ✓ Added [X] new project photos to gallery — compressed and optimized
- ✓ Revised homepage headline and intro paragraph
- ✓ Added testimonials section with [X] client quotes

SEO Work

- ✓ Updated all meta titles and descriptions with target keywords
- ✓ Fixed [X] missing alt-text tags on images

✓ Resubmitted updated XML sitemap to Google Search Console

✓ Optimized page load speed — reduced image file sizes by [X]%

Technical Maintenance

✓ SSL certificate verified and active

✓ Full link audit — 0 broken links found

✓ Cross-browser testing: Chrome, Safari, Firefox, Edge

✓ Mobile responsiveness verified on latest iOS and Android

Google Business Profile

✓ Posted [X] service updates and photos to GBP

✓ Responded to [X] of [X] new reviews within 48 hours

✓ Updated business hours / holiday schedule as needed

Action Items & Q2 Goals

How priorities work: **HIGH PRIORITY** items have the highest ROI right now and should be acted on this quarter. **MEDIUM PRIORITY** items are growth opportunities that will compound over time — start planning them now, execute when capacity allows. **ONGOING** items are habits and maintenance tasks that we handle consistently to maintain and grow your results. Items labeled “**Client**” under Owner require action on your end (e.g., sending photos, requesting reviews from customers). Items labeled “**Groundwork Studio**” are handled by us at no extra charge within your maintenance plan. Even small actions — like asking two customers a week for a review — compound into meaningful ranking improvements over a quarter.

HIGH PRIORITY

Grow Your Google Review Count

You have 14 reviews with a strong 4.8 rating. Reaching 20+ reviews this quarter will meaningfully boost your local search ranking and build trust with new visitors. We recommend sending a follow-up text to recent customers with a direct link to your Google review page within 24 hours of job completion. **Target: 8 new reviews in Q2.**

HIGH PRIORITY

Expand Content for Top Service Keywords

Your top 2 keywords currently rank positions 4–6, which is strong. Several keywords in positions 8–15 could be moved into top 5 with a dedicated service page targeting that specific term. We recommend adding one new page for '[secondary service]' this quarter. **Estimated impact: +15% organic clicks.**

MEDIUM PRIORITY

Add a Before / After or Project Gallery Section

Pages with visual content see significantly more time-on-site and lower bounce rates. Adding 10–15 photos of your recent work — with before/after comparisons where relevant — will give potential customers the visual proof they need to call. Send us the photos and we'll build it within the week. **Estimated completion: 5–7 days from content receipt.**

ONGOING

Maintain Weekly Google Business Profile Posts

GBP posting is directly contributing to your Discovery Search growth. Keeping 1 post per week going into Q2 will compound these results and signal to Google that your profile is active. **Included as part of the Growth Plan.**

Q2 Goals & Focus Areas

Goal	Target Metric	Timeline	Owner
Grow to 20+ Google reviews	20 total reviews	By end of Q2	Client (we provide link)
Rank top 5 for [secondary keyword]	Position 1–5	8–10 weeks	Groundwork Studio
Launch gallery / before-after section	Live page, 15+ photos	Week 2 of Q2	Client sends photos
Maintain site uptime above 99.9%	0 outages	All quarter	Groundwork Studio
Reach 1,600 sessions in June	1,600/month by June	End of Q2	Organic + GBP growth
