

Clean, fast websites for local businesses — built in days, not months. teamground.work

How It Works

1	2	3	4	5
Pick Your Tier	Pay 50% to Start	Send Your Content	Review & Approve	Pay Balance, Go Live
Choose the tier that fits your business. Tiers set the baseline — you're free to add or swap pages.	Work begins on deposit. Most sites are live within 1–2 weeks from content received.	Logo, photos, and any text you want included. We help shape it and make it look great.	2 full rounds of revisions included. We don't go live until you give the sign-off.	Final 50% due on launch day. Your site goes live the moment payment clears.

What You're Paying For

Every site we build is designed and coded from scratch — no drag-and-drop builders, no templates from a library, no recycled layouts. Each page is custom-written, mobile-optimized, and built for speed and search visibility. When you compare our pricing to a freelancer marketplace or a DIY builder, you're comparing a custom-built vehicle to a rental car. Here's what's included in every build, regardless of tier:

Custom Design	Your site is built to match your brand — not a template. Colors, layout, fonts, and tone are all tailored to your business and the customers you're trying to reach.
Mobile-First Build	Over 60% of local service searches happen on a phone. Every page is designed to look and work perfectly on mobile before anything else.
Fast Load Times	We use lightweight, hand-coded HTML and CSS — no bloated plugins or page builders. Google rewards fast sites with higher rankings. Slow sites lose customers before the page even loads.
SEO-Ready Structure	Page titles, headings, meta descriptions, and URL structure are all set up correctly from day one. You won't need to hire an SEO consultant just to get found locally.
Copywriting Included	We write the words on your site — not just the layout. You provide the facts; we turn them into clear, professional copy that speaks to your customers and drives action.

Site Tiers — Your Starting Point

Tiers are baselines, not boxes. Every tier includes service detail pages — you give us the content for each service and we build a dedicated page for it. The tier you choose sets your page count and starting price. You can customize from there — add pages, remove them, or mix across tiers.

TIER 1	TIER 2	TIER 3	TIER 4
Foundation \$1,000 1 page · Home, Services, Areas We Serve, Contact + Scheduling <i>New businesses establishing a clean, professional online presence</i>	Standard \$1,500 1 page · Tier 1 + About, Gallery, Reviews, FAQ <i>Growing businesses that need trust signals and social proof</i>	Elevated \$2,000 Everything in Tier 2 + Financing · Specials · Blog (1–7 pages, varies by industry) <i>Full-featured build for established businesses that want the whole picture</i>	Premium \$2,500 Everything in Tier 3 + Blog · Online Booking + Deep SEO · 8–11 Pages <i>Full multi-page suite for businesses that want to dominate locally</i>

Tiers are baselines — every site is configured to your business. You can add pages from a higher tier, skip what you don't need, or go fully custom. Custom estimates available.

What Each Tier Gets You — In Plain Terms

TIER	PAGES INCLUDED	WHY THIS PRICE
Tier 1 Foundation \$1,000	1 page — Home, Services Overview, Areas We Serve, Contact + Scheduling. Service detail sections built in for every service you offer.	\$1,000 is not a template. Every pixel is designed and coded for your business — your brand, your services, your customers. Includes copywriting, mobile optimization, SEO-ready structure, and full hosting setup. That's the price.
Tier 2 Standard \$1,500	1 page — Everything in Tier 1, plus About, Gallery, Reviews, FAQ.	The extra \$500 adds four high-converting sections. An About page increases contact rates — people want to know who they're letting in. Gallery and Reviews give visitors the proof they need. FAQ cuts down on repetitive calls. Each section takes real design and writing time.
Tier 3 Elevated \$2,000	Everything in Tier 2 · Financing Page · Specials Page · Blog (1–7 pages total, configuration varies by industry)	At this level you're building a complete online business presence. Financing pages remove the biggest objection before a customer calls. A blog and specials page give you a place to run offers and publish content without rebuilding the site. This is the tier most established service businesses end up wanting once they see what's possible.

Tier 4 Premium \$2,500	Everything in Tier 3 · Blog · Online Booking System · Deep SEO Architecture · 8–11 Pages Total	\$2,500 reflects the full scope: a blog requires structure and written content; online booking requires integration and multi-device testing; 8–11 pages means 8–11 individually designed, written, and optimized pages. This tier is for businesses that want to dominate their local market — not just have a presence.
---------------------------------------	--	---

Monthly Plans — Keeping Your Site Running

Once your site is live, a monthly plan keeps it online, secure, and up to date. The rate you pay scales with your tier — more pages means more to monitor, maintain, and update each month. Every plan includes full hosting. You are not paying for a third-party platform subscription — your monthly fee covers everything needed to keep your site running.

PLAN	RATE BY TIER	WHAT'S INCLUDED — AND WHY IT COSTS WHAT IT DOES
Maintenance	T1: \$125/mo T2: \$150/mo T3: \$175/mo T4: \$200/mo	What's included: Netlify hosting on a global CDN, SSL certificate (the security padlock in your browser), uptime monitoring with alerts, all security and platform updates, minor content edits on request (up to 1 hour/month), and a monthly uptime report sent to you. Why the price varies by tier: A 4-page Tier 1 site takes significantly less time to maintain and monitor than a 15-page Tier 4 site. More pages means more content to update, more links to check, and more potential points of failure to watch. The rate reflects actual time spent, not a flat fee charged regardless of work. Most clients choose this plan. It's the peace of mind that your site is being watched by someone who cares — for less than a tank of gas per month.
Growth	T1: \$275/mo T2: \$300/mo T3: \$350/mo T4: \$425/mo	What's included: Everything in Maintenance, plus active Google presence management. 1–3 Google Business Profile posts per month, responses to all new Google reviews, monthly SEO refresh (meta titles and descriptions updated), monthly keyword ranking report, and for higher tiers: proactive review generation strategy, page copy optimization, and quarterly competitor keyword gap analysis. Why it costs more: This plan involves real, ongoing work each month — writing posts, monitoring rankings, responding to reviews, and making data-driven adjustments. It's not automated. A real person is actively working on your Google presence every month. The tier scaling reflects the larger surface area of a bigger site to optimize.
Local Presence Add-On	\$49/mo + \$99 setup (any tier)	What's included: Setup and management of your Nextdoor Business page. Monthly neighborhood posts written and published, monitoring for neighbor recommendations and service requests, and responding to messages and questions in your area. Why Nextdoor matters: Most homeowners don't Google for a plumber or roofer — they ask their neighbors. Nextdoor is where those conversations happen. This add-on puts your business into those conversations before a competitor shows up. Flat rate — same price regardless of tier.

If you cancel your monthly plan, your site will go offline. A \$250 migration fee applies if you'd like the site files transferred to a new host.

Add-On Services — Optional Extras

Nothing below is bundled in unless you choose it. Add-ons are available with any tier.

ADD-ON	PRICE	WHAT YOU GET — AND WHY IT'S PRICED THIS WAY
Logo & Brand Identity	\$300 – \$600	A professionally designed logo and full brand kit — color palette, fonts, and logo files in all formats (PNG, SVG, PDF). Range reflects complexity: a simple wordmark is \$300; a custom icon-based logo with full brand guidelines is \$600. Delivered before the site launches so everything matches.
Google Business Profile Setup	\$200 – \$350	We create or claim your Google Business listing, upload photos, write your business description, configure your service list and hours, and complete full verification. This is the card that appears when someone searches your name or 'service near me' on Google Maps. Range reflects whether the listing exists and needs cleanup (\$200) or needs to be built from scratch (\$350).
SEO Foundation Package	\$400 – \$700	Keyword research specific to your service area, meta titles and descriptions written for every page, schema markup (structured data that tells Google exactly what your business does), and sitemap submission to Google Search Console. Range reflects site size — a 4-page Tier 1 site is \$400; a 12-page Tier 3 site is closer to \$700.
Booking / Scheduling Integration	\$300 – \$500	Connects an online booking tool (Calendly, Square Appointments, or Acuity) to your site so customers can schedule without calling. You set your availability — customers book themselves, and you get a notification. Price reflects integration complexity and whether a new account needs setup.
Google & Meta Ads Setup	\$400 setup + 10–15%/mo of ad spend	We build and manage paid ad campaigns on Google Search and/or Facebook/Instagram targeting customers in your service area. You control the budget — we write the ads, build the campaigns, and optimize monthly. The setup fee covers campaign architecture and ad copy. The monthly percentage covers ongoing management and reporting.
Domain Registration & Setup	\$50 – \$75	We handle the domain purchase and full DNS connection — no GoDaddy account needed, no technical steps. Alternatively, you can buy your own domain through GoDaddy or Namecheap (\$12–\$15/yr) and we connect it to your site at no extra charge. The \$50–\$75 is for the purchase and setup service only.
Rush Delivery	+25% of build fee	Guarantees your project moves to the front of the queue and is completed in under 2 weeks. Standard turnaround is already 1–2 weeks — rush delivery reserves dedicated focus time for your project and may require evening or weekend work to hit the deadline.

Good to Know

Revisions	2 full rounds included. One consolidated list of changes per round — not individual requests spread over days. Additional rounds are \$75/hour.
Content Deadline	Logo, photos, and copy due within 14 days of signing. After that, a \$200 delay fee applies and your timeline shifts accordingly.
Ownership	Your text, photos, and copy are yours. The underlying code belongs to Groundwork Studio until the build fee is paid in full. Cancel your monthly plan and a \$250 migration fee applies to transfer files to a new host.
Custom Quotes	Tiers are starting points. Mix pages from any tier, skip what you don't need, or go fully custom. Contact us for an exact quote.
